

VISHNU J G

Software Engineer

Profile

I am a proficient Computer Science Engineer with a solid background in automation and platform engineering. I specialise in building and maintaining highly scalable and reliable infrastructures and services, particularly in search, recommendation, and auto-suggestion technologies. With expertise in web development, software engineering, and automation, I excel at creating robust solutions that enhance system performance and drive innovation. My focus is on leveraging my technical skills to develop impactful and efficient applications.
